

Grant F&A Policy

Introduction

Promiliad Biopharma Incorporated receives grant awards from federal agencies such as the National Institutes of Health. Promiliad makes grant awards to other institutions either as subawards (pass-through) on Federal grants or as independent awards, the latter being funded directly by Promiliad. This document describes Promiliad's policies for F&A rate calculations.

Policy for Pass Through Awards

Where a grant award originates with a federal sponsor, and is passed to a subrecipient, Promiliad will incorporate the subrecipients F&A costs into the subaward in accordance with an appropriate Notice of Grant Award and at a rate equal to the subrecipients normally negotiated F&A rate.

Policy for Direct Awards

Where a grant award originates with Promiliad, Promiliad will not pay the F&A costs of the recipient.
